PROFESSIONAL SUMMARY

Front-End Engineer with 3+ years of experience shipping 8 production applications across SaaS, e-commerce, and enterprise for international clients. Specialized in React, Next.js, and TypeScript, with strong expertise in reusable design systems, UI/UX implementation, and component-driven development. Proven record of owning features end-to-end, mentoring 2 developers, and delivering production-grade experiences across 12 client engagements.

WORK EXPERIENCE

Software Engineer

May 2023 – Sept 2026

Mugna Technologies | Davao, Philippines

- Delivered 8 production applications across 12 client engagements using React, Next.js, and TypeScript, partnering with backend teams on end-to-end product experiences.
- Designed modular front-end architectures and reusable component systems for medium- to large-scale apps, improving maintainability and development velocity.
- Mentored 2 junior developers through code reviews, pair programming, and architecture guidance.
- Implemented Storybook across internal projects to standardize UI documentation and reduce design drift.
- Created and refined rules for AI-assisted development agents (Cursor, Copilot), standardizing automated coding workflows for the team.
- Owned the full feature lifecycle: technical planning, implementation, testing, documentation, deployment, and post-release support.

SELECT PROJECT EXPERIENCE

Project Blueprint | Reusable Next.js Starter

- Built a reusable Next.js template covering onboarding, authenticated flows, and a CLI-installable chat plugin (Zustand + ShadCN) used as the base for upcoming client projects.

Financeable | Loan Brokerage Platform

<https://financeable.com.au>

- Shipped 2 production surfaces for Australian brokers: a React + Redux Toolkit lender workflow app and a Next.js + Material UI marketing site.
- Built Express.js + Mongoose migration endpoints to transform and sync lender datasets between front-end and back-end systems.

Hardware E-Commerce Platform | Multi-Branch Retail System

- Built a Saleor-powered storefront supporting 100+ nationwide branches, with GraphQL Code Generator, CMS-driven pages, and a Leaflet locator for every store.
- Added Stripo email templates for all user types and secure Next.js API routes for extra request validation.

Coworking Management System | Booking & Operations Platform

- Delivered 4 core workflows (booking, scheduling, dashboard, admin) with conflict-aware reservation logic and RBAC for 2 roles (admins and members).
- Integrated Supabase for authentication, relational data, and real-time availability sync.

SELECT PROJECT EXPERIENCE (CONTINUED)

Specialty Coffee Depot | E-Commerce Platform

- Led front-end delivery of a production storefront covering 3 core flows (checkout, authentication, purchase) on Next.js + Saleor, backed by a reusable Chakra UI system.

Awardnex | Online Judging Platform

<https://awardnex.com>

- Built dynamic scoring and judging UIs for a European cybersecurity awards platform using Tailwind CSS and Django templates.
- Contributed front-end code reviews to keep judging pages aligned with engineering standards.

Mugna Website V2 | Corporate Website

<https://mugna.tech>

- Rebuilt the company site in Next.js with Contentful CMS so marketing could update services and product pages without engineering.
- Added scroll-triggered animations and interactive UI effects with Intersection Observer.

School Accounting System | Multi-Module Enterprise Platform

- Built admin UIs for a multi-branch accounting platform covering 3+ modules (Chart of Accounts, Fee Codes, AP/AR), with TanStack Query SSR, Chart.js reporting, and permission-based UI.
- Supervised interns on the project to keep contributions aligned with technical standards.

EDUCATION

Ateneo de Davao University

Graduated May 2023

Bachelor of Science in Information Systems | Davao, Philippines

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Material UI, Chakra UI, ShadCN, Redux Toolkit, Zustand, React Query

Backend: Node.js, Express.js, Supabase, Firebase, REST APIs, GraphQL, Apollo

Database: PostgreSQL, MongoDB, MySQL

Mobile: React Native, Flutter

Testing: Jest, Cypress, Playwright

Tools: Git, Contentful, Saleor, Webpack, Vite, Storybook
