PROFESSIONAL SUMMARY

Front-End Engineer with 3+ years of experience building scalable SaaS, e-commerce, and enterprise web applications for international clients. Specialized in React, Next.js, TypeScript, and modern front-end architecture with strong expertise in reusable design systems, UI/UX implementation, performance optimization, and component-driven development. Proven track record of owning front-end features end-to-end, mentoring developers, and delivering polished production-grade user experiences aligned with business objectives.

WORK EXPERIENCE

Software Engineer

Mugna Technologies | Davao, Philippines

January 2023 – January 2026

- Architected and delivered scalable front-end applications across **12 client engagements** using React, Next.js, and TypeScript, partnering closely with backend teams to deliver end-to-end product experiences.
- Designed modular front-end architectures and reusable component systems for medium-to large-scale applications, improving maintainability and development velocity across teams.
- Led technical decision-making and established engineering standards for architecture, code quality, and front-end best practices.
- Mentored **2 junior developers** through code reviews, pair programming, and architectural guidance, improving team engineering output and development consistency.
- Improved developer experience and component consistency by implementing **Storybook** across internal projects, streamlining UI development and documentation workflows.
- Contributed to internal engineering innovation by creating and refining rules for **AI-assisted development agents**, helping standardize automated coding workflows and team practices.
- Owned full feature lifecycle from technical planning and implementation through testing, documentation, deployment, and post-release support.

SELECT PROJECT EXPERIENCE

Financeable | Loan Brokerage Platform

<https://financeable.com.au>

- Developed lender-facing workflow and data management interfaces for Australian loan brokerage operations using React.js and Redux Toolkit.
- Built backend migration endpoints with Express.js and Mongoose to transform and synchronize lender datasets across systems.
- Delivered marketing/showcase website in Next.js with Material UI to support product branding and lead generation.

Hardware E-Commerce Platform | Multi-Branch Retail System

- Built dynamic e-commerce storefront for a nationwide hardware retailer supporting 100+ store branches.
- Integrated product catalog and CMS-driven content via Saleor GraphQL APIs and GraphQL Code Generator.
- Implemented interactive branch locator with Leaflet to improve branch discovery and customer experience.
- Developed secure Next.js API routes for enhanced validation and backend request protection.

Coworking Management System | Booking & Operations Platform

- Developed full-featured coworking management platform with booking, scheduling, dashboard, and administrative workflows.
- Implemented conflict-aware booking and scheduling logic for shared resources and workspace reservations.
- Integrated Supabase for authentication, relational database management, and real-time data synchronization.
- Designed role-based access control flows for administrators and members.

Specialty Coffee Depot | E-Commerce Platform

- Led front-end development of production e-commerce storefront for specialty coffee retailer.
- Implemented checkout, authentication, and purchase workflows using Next.js and Saleor.
- Built reusable Chakra UI component system to accelerate feature development and maintain design consistency.

Mugna Website V2 | Corporate Website

<https://mugna.tech>

- Rebuilt Mugna Technologies' corporate website using Next.js to modernize the company's digital presence and improve maintainability.
- Integrated Contentful CMS to enable dynamic content management for marketing and non-technical stakeholders.
- Implemented scroll-triggered animations and interactive UI effects using Intersection Observer for enhanced user engagement.
- Developed responsive marketing pages to showcase company services, products, and technical offerings.

School Accounting System | Multi-Module Enterprise Platform

- Developed responsive administrative interfaces for a multi-branch accounting platform supporting financial operations across multiple academic institution branches.
- Built reusable front-end components utilized across core accounting and reporting modules to improve development consistency.
- Implemented SSR-enabled dynamic pages and optimized server/client data fetching using TanStack React Query.
- Developed tabular reporting interfaces and data visualizations using Chart.js for finance and administrative users.
- Implemented role-based access controls and permission-based UI rendering aligned with backend authorization rules.
- Supervised interns contributing to the project, ensuring code quality and adherence to technical standards.

EDUCATION

Ateneo de Davao University | Davao, Philippines

Bachelor of Science in Information Systems

Graduated May 2023

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Material UI, Chakra UI, ShadCN, Redux Toolkit, Zustand, React Query

Backend: Node.js, Express.js, Supabase, Firebase, REST APIs, GraphQL, Apollo

Database: PostgreSQL, MongoDB, MySQL

Mobile: React Native, Flutter

Testing: Jest, Cypress, Playwright

Tools & Platforms: Git, Contentful, Saleor, Webpack, Vite

INTERESTS

Front-End Architecture | Scalable Systems | UI/UX Engineering | Web Performance | Emerging Web Technologies
